

SPECIFICATIONS

<b>WHERE TO USE</b>	Ledges, eaves, angle irons, I-Beams and most "L" shaped ledges where total exclusion is the goal.
<b>TARGET BIRD</b>	All species, including Swallows
<b>BIRD PRESSURE</b>	All pressure levels
<b>MATERIAL</b>	UV-stabilized Polycarbonate
<b>INSTALLATION</b>	Base is glued to any surface
<b>INSTALLATION LEVEL</b>	Easy to Moderate

*BirdSlide's slope leaves nowhere for birds to roost on the ledge of this parking garage.*

### when total exclusion is a must

There are ledges where heavy pressure (nesting birds) demands an exclusion system, and netting may be visually unacceptable. BirdSlide completely protects the ledge against all bird species; they simply can't get a grip and "slide" right off the ledge.

### designed to disappear

When color matched to the structure, BirdSlide usually looks like it's a part of the building. It comes in gray or beige, but can be primed and painted to match any color.

### easy to install

For ledges six inches, the flat base simply glues to any clean surface using Bird Barrier bond. For narrow ledges the "fin" can be trimmed down; for wider ledges an extension can be added. BirdSlide can be screwed to wood.

### long-lasting

Made from UV-stabilized polycarbonate. Two-year warranty against UV breakdown. Paint the product to extend its life.

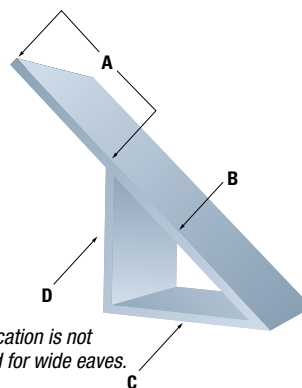

*What used to be a protected roosting area is now completely protected. Birds can't even land here.*

Ledges between the beams are an ideal application for BirdSlide.

*BirdSlide can be a great deterrent for swallow nests when it's installed at an inverted angle.\**

*\*Inverted application is not recommended for wide eaves.*

BirdSlide sits on the base (C). The extension (A) can be trimmed to accommodate narrow ledges and beams. End Caps slide (see next page) slide into the triangular base opening. Slide-on extensions can increase the coverage of the BirdSlide.

- A) Trim Area = 4 in.
- B) Slide = 4 in.
- C) Bottom = 2.625 in.
- D) Back Side = 2.75 in.

## BirdSlide

BirdSlide is sold by the 52-foot case. Each case contains 13 four-foot sections. End caps are sold in sets of five, extensions are sold in 52-foot cases like the BirdSlide itself. BirdSlide comes in 4-foot lengths.

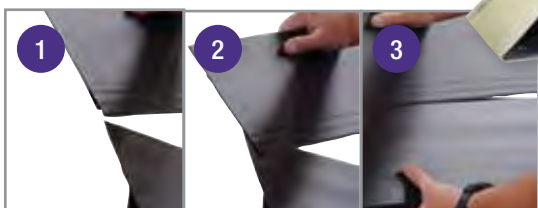

BirdSlide Beige (52 ft.)	SL-B00	639848
BirdSlide Gray (52 ft.)	SL-G00	639846

## Slide-on Extensions

For wider ledges (see photo at bottom of page), BirdSlide Extensions can be added to increase the size and coverage. Extensions are 6" wide, and now they just slide on to the top of the BirdSlide. This is a fast and easy process which looks attractive and professional.

Beige Extension (52 ft.)	SL-B20	674212
Gray Extension (52 ft.)	SL-G20	645201

## End-Caps

Color-matched end-caps enable the applicator to install a seamless, attractive solution. The tube slides snugly into the triangular base opening. Simply glue them in and you're done (sold in a pack of 5 right and 5 left end caps).

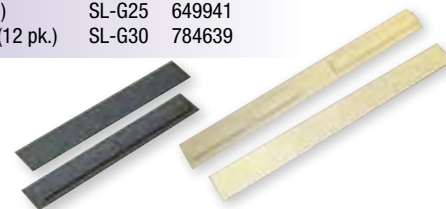

Sm. End-Caps Beige (5)	SL-B10	639870
Sm. End-Caps Gray (5)	SL-G10	638206
Lg. End-Caps Beige (5)	SL-B15	635331
Lg. End-Caps Gray (5)	SL-G15	674221

## BirdSlide Seam Connectors

Gaps can appear between sections of BirdSlide when mounting to uneven surfaces. These extruded "H" strips lock the ends together and fill in the seam.

6 in. Beige Connectors (12 pk.)	SL-B25	654744
12 in. Beige Connectors (12 pk.)	SL-B30	784638
6 in. Connectors (12 pk.)	SL-G25	649941
12 in. Gray Connectors (12 pk.)	SL-G30	784639

## Bird Barrier Bond

Bird Barrier Bond can be used to glue down BirdSlide to clean surfaces. Application Guidelines: 10.2 oz. bond installs 25 ft.

New Bond 10.2 oz. (ea.)	HA-BB03	776954
Original Bond 10.2 oz. (ea.)	HA-BB04	776732

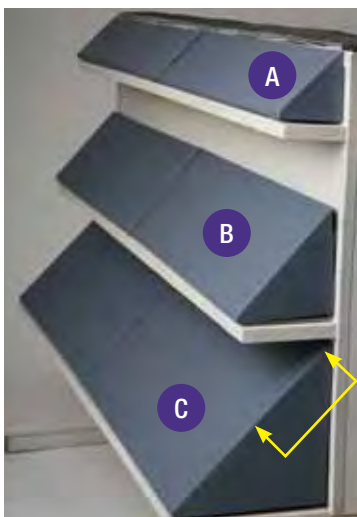

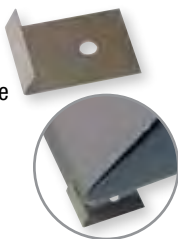

See page 46 for important Bond information.

## BirdSlide Mounting Clip

Used to support BirdSlide when it is installed in the eaves to deter mud nests. Can also be used to secure the top edge to the structure when BirdSlide is installed on a ledge.

Mounting Clip (100)	SL-SC00	674218
---------------------	---------	--------

### (A) Ledges 3" to 6" Wide

Cut the trim area at the appropriate width.

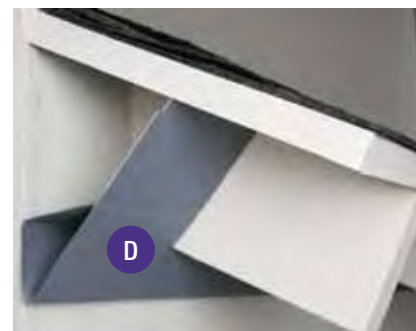

### (B) 6" Ledges

Use BirdSlide exactly as it comes out of the box.

### (C) Ledges Wider than 6"

Attach these special extensions for even wider coverage.

- » BirdSlide up to 10-foot long. Custom ordered.
- NOTE: extra freight will be charged for dimensional weight.
- » Custom primer and painting available to match any paint chip.
- » Call for details.

### (D) Eaves

BirdSlide can be installed under eaves to exclude mud swallows. It can easily be cut to accommodate beams and other building features.
