

NEW

Install with Bird Barrier Bond, p. 15

WHERE TO USE	Ledges, parapets caps, roof peaks, chimneys
TARGET BIRD	Pigeon and larger
BIRD PRESSURE	Medium (Do not use where birds are nesting)
MATERIAL	Stainless Steel - 304 grade wires and base welded together
INSTALLATION	Base is glued or screwed to any surface
INSTALLATION LEVEL	Easy

Fast and Easy Application

Dura-Spike is an all stainless steel spike that comes in three-foot lengths for fast application. The base can be cut easily with snips or shears. It curves gently or takes hard bends to conform to the building's features.

How it Works

Pigeons and larger birds are not able to gain a foothold on the protected surface and are forced to take their mess elsewhere.

How to Install

Use the spacing guides (right) to determine the best model for the application. Clean the surface thoroughly. Secure using Bird Barrier Bond (see page 15) or screw it down.

Warranty

Bird Barrier's Dura-Spike is warranted for ten years and should perform for many more years.

Totally Humane

The blunt tips on the ends of each spike can not hurt birds or humans.

Installation and Application

Dura-Spike comes in 3-foot lengths for rapid installation.

Stacks for Shipping Efficiency
The parts stack, this requires a much smaller box.

Dura-Spike

Sold in 3-foot lengths. Cases contain 34 pieces (102 ft.).

Narrow 2 1/2" (3 ft.)	BP-S200	784629
Wide 5" (3 ft.)	BP-S400	784630
Xtra Wide 8" (3 ft.)	BP-S600	784631

From the ground it is almost impossible to see the Dura-Spike that is protecting this building.

The top of this sign is effectively protected with the Dura-Spike. Multiple rows ensure the entire surface is bird proofed.

Visible up close, but invisible from the distance, Dura-Spike protects this ledge and the sign letters from pigeons.
