## Fast and Easy Application

Dura-Spike is an all stainless steel spike that is supplied in 915mm (3-foot) lengths for fast application. The base can be cut easily with snips or shears. It curves gently or takes hard bends to conform to the building's features.

## How it Works

Pigeons and larger birds are not able to gain a foothold on the protected surface and are forced to take their mess elsewhere.

## How to Install

Use the spacing guides (right) to determine the best model for the application. Clean the surface thoroughly. Secure using Bird Barrier Bond or screw it down.

## Warranty

Bird Barrier's Dura-Spike is warranted for ten years and should perform for many more years.

## Totally Humane

The blunt tips on the ends of each spike can not hurt birds or humans.

## Installation and Application

Dura-Spike comes in 915mm (3-foot) lengths for rapid installation.
