PestIT offers FREE quoting support, product advice and service when it comes to bird management. Our team of professionals are available, Monday to Friday, between 8:00 am and 4:30 pm. Contact us on 1300 665 657 or visit our web site.

Cleaner Greener Smarter

The Innovator in Modern Pest Management

Pest IT are industry leaders for innovative and effective solutions in pest control. By choosing PestIT, you can not only help reduce waste and remove reliance on chemicals, but you can take the right step in choosing smarter technology for your facility, home or place of business. As an Australian company that distributes and manufactures non-chemical, device-driven pest management products, we have a strong focus on providing support, training, consulting and business services to the pest management, grain, food production and hospitality industries. Our unique and advanced technologies range from Heat, IoT Sensors, pheromone and EMF to name but a few.

Incorporated in 2004, PestIT is the manufacturer of AvePro Bird Control Systems, Viper Insect and Rodent products, Myna Magnet and the Magnet Trap range of products. We have an extensive range of the best pest management equipment brands available including Symterra (formerly Flock Off), Thermo-Bug, Tri-Flo, Bird Barrier, BRC and Eagle Eye.

As pest control specialists and an industry supplier to a wide variety of small and large businesses, PestIT's focus is to supply non-chemical solutions to achieve the best possible pest control outcomes. We create, distribute and support our clients with pest control products and systems that are 'cleaner, greener and smarter'. In today's climate, our 'green' approach remains sensitive to managing broader implications for global warming. By choosing PestIT, we help reduced waste, remove chemical usage and lead the way forward for smarter technology.

As an innovator, PestIT has launched numerous significant developments. In 2004 we introduced the first "on-site" bird management training program, in 2006 the first commercial bird shock system, in 2008 the first commercial visual deterrent system, and many technologies since. Fast forward to 2022, PestIT introduced electromagnetic field technology in Symterra / Flock Off which has helped the company with its 20 year innovative revolution of Australian bird management.

Celebrating 20 years of dedication to pest management information, technology and training

OUR PEOPLE

Peter McCarthy has enjoyed over 34 years of involvement and dedication to distribution, training, consulting and support to the Australian pest management industry. Peter has qualifications in horticulture, marketing and pest management. He has run training programs on many aspects of pest and business management over the past three decade. Peter is a frequent guest speaker at pest, grain and food industry conferences both Australia-wide and overseas including AEPMA, HACCP, PMANZ, FAOPMA and NPMA technical platforms.

Rebecca Bone joined the Pest IT team in early 2019 as the company's Office Manager, helping to streamline many of our internal processes. Rebecca has been a key asset in helping combine our numerous websites focusing on various aspects of pest control into our new site – www.pestIT.com.au, an advanced, modern shopping experience for all your pest management needs.
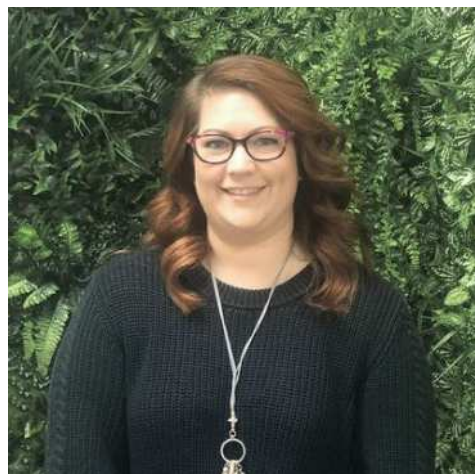

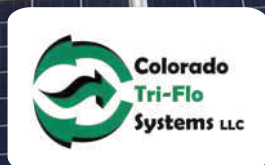

Looking for a new Career?

At present, we are searching for new team members in both customer service and training to assist our efforts.

OUR BRANDS

Our Range Of Products Include:

AvePro Bird Control Systems

Our signature bird management range is one of Australia's most extensive group of physical deterrents, exclusion systems, scare devices and electric ledge systems. Combined with PestIT's unrivalled expertise in bird management, on-site training, quoting and design support, we have all the product and assistance needed by bird management professionals, facility managers, commercial and government facilities.

Magnet Trap

The Magnet Trap is a professional grade range of heavy-duty, collapsible vertebrate pest traps. The range includes the world-famous Myna Magnet for the selective trapping of invasive common mynas, as well as traps for the management of foxes, pigeons, possums, feral cats and a variety of other vertebrate pests.

Viper Insect and Rodent Systems

Our latest brand to join the PestIT group of brands include the Viper range of specialised, non-chemical rodent and insect systems. In keeping with our strong commitment to humane, non-chemical control, we have developed a range of insect glueboards, live capture rodent traps, high security vandal-proof rodent stations, premium plastic stations, glueboards and rodent snap traps for an instant humane treatment of disease-carrying pests.

OUR BRANDS

Eagle Eye Bird Deterrents

The Eagle Eye™ is an effective bird deterrent device that harmlessly relocates pest birds. Birds are irritated by reflected light beams that flash at various angles from a rotating Eagle Eye™ unit. The system has been extensively tested and used at hundreds of locations in Australia as well as internationally. The range now includes solar driven, 240v powered, LED light assisted, wind-driven and numerous configurations to deter birds.

BRC Fly Units

BRC insect traps are suited to all environments, including the harshest industrial situations. Whether electric or glue-based, the insect traps offer the most reliable solution against flying insects at a low operating cost. In fact, their effectiveness is based on the strong attraction of insects to the UVA fluorescent lamps. Their non-polluting properties and chemical- and odour-free features make them environmentally friendly, economical and durable.

Tri-Flo Heaters

Tri-Flo heaters are a convenient 240v, durable, simple, and safe way to eradicate bed bugs! By raising the room air temperature to above 50°c, this destroys all bed bugs at any stage of development, including eggs and larvae. This chemical-free sustainable solution is great for homeowners, hotels and motels, transport vessels and professional pest controllers alike.

Symterra (formerly known as Flock Off)

The Symterra system harnesses the power of science with cutting-edge electromagnetic technology to offer an intelligent, humane, and eco-friendly approach to avian management. Developed by a team of experts and engineers, this product takes a giant leap forward in providing a long-lasting solution to persistent bird infestations in a range of industries and environments. Launched in Australia and New Zealand by PestIT, Symterra is revolutionising how we deter a wide variety of bird species from flat roofs, building facades, architectural features and indoor applications.

BIRD NETTING

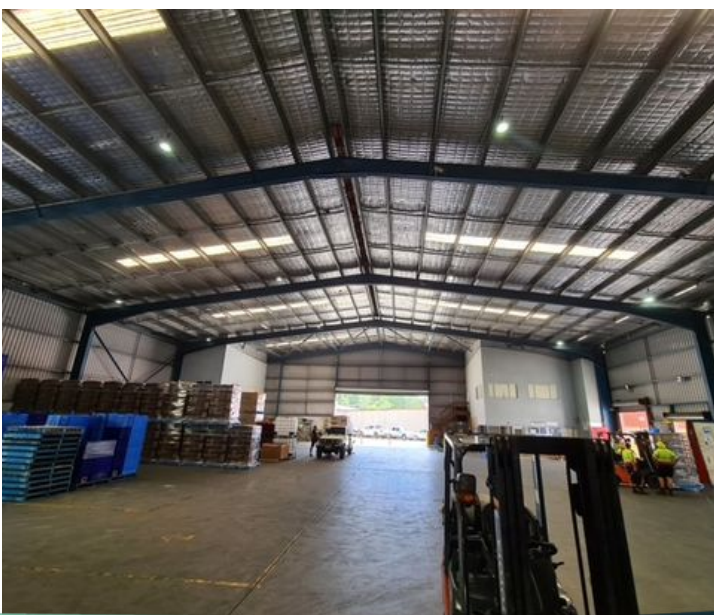

AvePro Deluxe Bird Netting

10-year manufacturer's warranty

AvePro Bird Netting sets the industry standard for strength, quality, UV stability and is backed by a 10-year manufacturer's warranty. AvePro Bird Netting is the ideal choice when it comes to excluding pest bird access to any architectural configuration that can be enclosed. This includes industrial, commercial, agricultural and domestic situations. Examples include warehouse ceilings, courtyards, open roof tops, loading docks, awnings, overhangs, parking garages, and building facades.
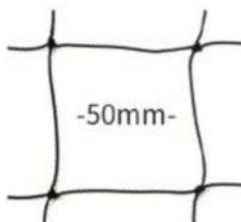

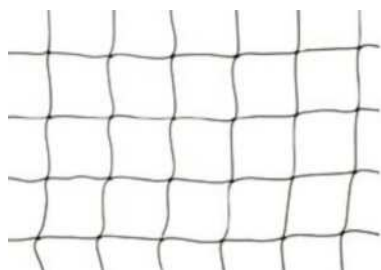

Specifications:

• Premium high-density polyethylene (HDPE) square, knotted net designed specifically for architectural use.
• Heat and fire resistance, as well as pest (vermin) and chemical resistant.
• Pre-stretched and heat-set during production, ensures that this net will not sage excessively over time.
• The UV stability additive in the high-density polyethylene (HDPE) allows for our unbeatable manufacturer's backed 10 year warranty. Even under Australia's harsh external climate.
• AvePro Deluxe is made to an ISO9001 accreditation.

BIRD SPIKES - POLY

AvePro Bird Spike Narrow

AvePro Bird Spike Wide

AvePro Bird Spike

AvePro bird spikes are the professionals' choice when it comes to deterring large pest birds from ledges, parapets, beams, roofs and numerous other building surfaces. AvePro offers building managers and professional installers a durable, effective and long-life system. The system is discreet, easy to install and offers versatility to conform to a wide range of architectural building features.
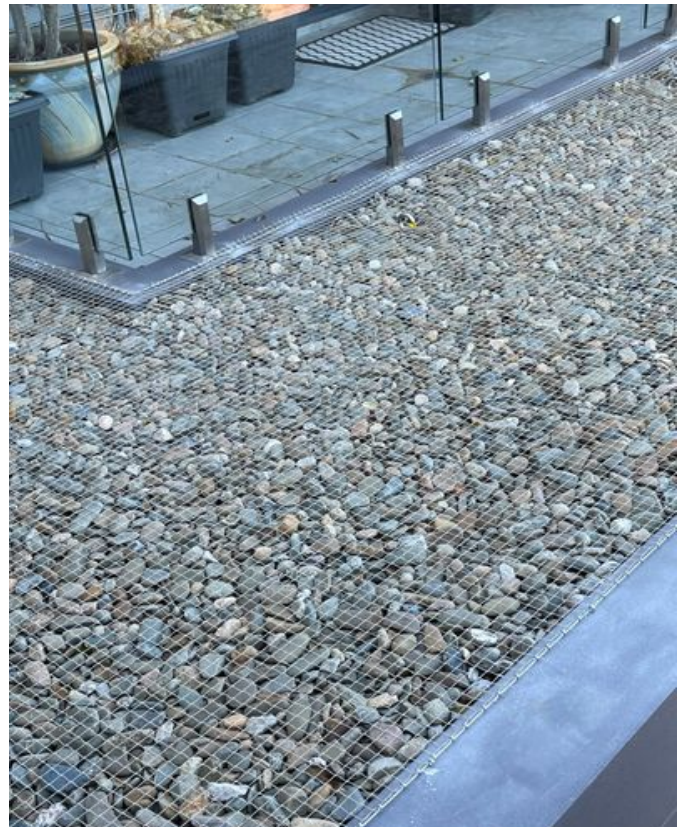

AvePro Bird Spike Narrow

Description:

Width: 50mm
Height: 115mm
Length: 500mmm
CTN: 40 x 500mm (20 meter)
Order Code: 13-APBS-N20

Suited to use on beams and long, narrow architectural features.

AvePro Bird Spike Wide

Description:

Width: 125mm
Height: 115mm
Length: 500mmm
CTN: 40 x 500mm (20 meter)
Order Code: 13-APBS-W20

Suited to use on wide variety of building ledges, edges, beams and architectural features.
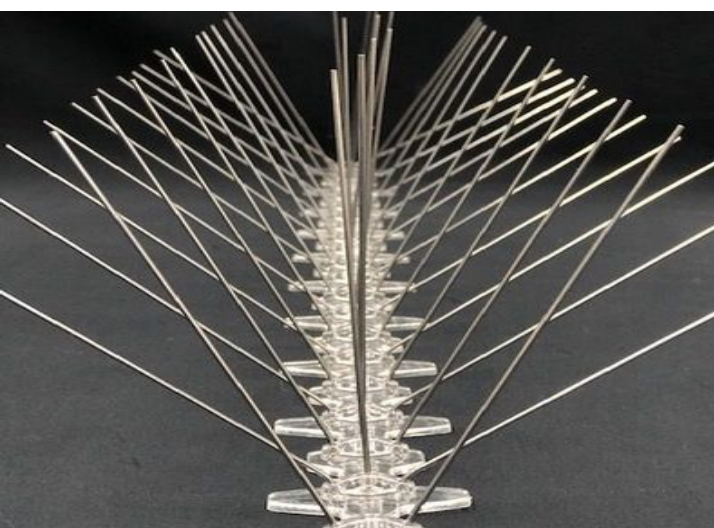

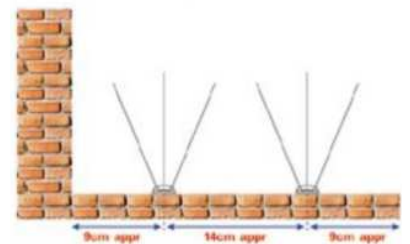

AvePro Bird Spike Xtra-Wide
Description:

Width: 195mm
Height: 115mm
Length: 500mmm
CTN: 40 x 500mm (20 meter)
Order Code: 13-APBS-XW20

Suited to use on wide variety of parapets, ledges and beams to reduce the need of multiple rows.

Cleaner Greener Smarter

AvePro Deluxe Bird Spike Narrow

AvePro Deluxe Bird Spike Wide

AvePro Deluxe Bird Spike Xtra-Wide

AvePro St. Steel Bird Spikes

The harsh Australian climate and UV intensity has resulted in the development of the AvePro Stainless Steel Spikes. This product is 302 grade stainless steel, which remains one of the most durable construction materials available. The system has been in use for many years externally on Australian commercial buildings and industrial applications. AvePro has a 10-year manufacturer's replacement warranty for use in external, full sun situations.

Deluxe Bird Spike Narrow

Description:

Width: 50mm
Height: 115mm
Length: 500mmm
CTN: 40 x 500mm (20 meter)
Order Code: 13-APDBS-20N

Suited to use on beams and long, narrow architectural features.
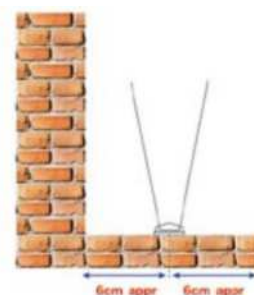

Deluxe Bird Spike Wide

Description:

Width: 125mm
Height: 115mm
Length: 500mmm
CTN: 40 x 500mm (20 meter)
Order Code: 13-APDBS-20W

Suited to use on wide variety of building ledges, edges, beams and architectural features.

## Deluxe Bird Spike Xtra-Wide

Description:

Width: 195mm
Height: 115mm
Length: 500mmm
CTN: 40 x 500mm (20 meter)
Order Code: 13-APDBS-20XW

Suited to use on wide variety of parapets, ledges and beams to reduce the need of multiple rows.

Cleaner Greener Smarter
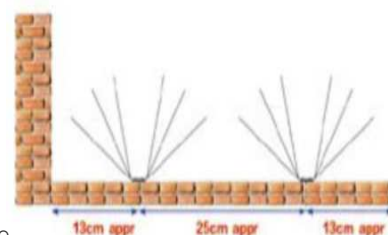

AvePro Deluxe Gutter Spike
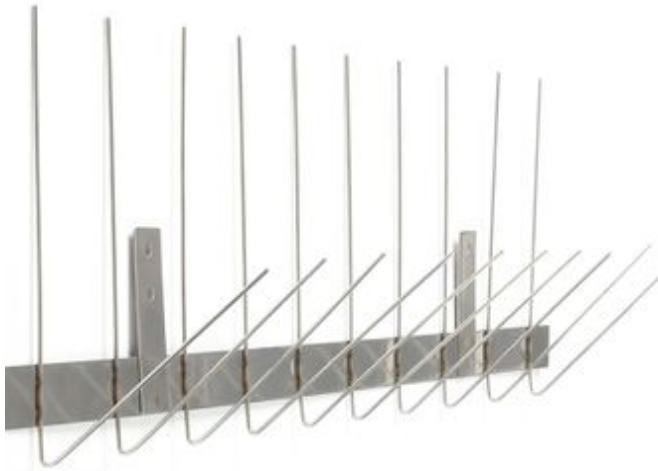

AvePro Deluxe Possum Spike

Deluxe Gutter Spike

Width: 125mm
Height: 115mm
Length: 500mmm
CTN: 40 x 500mm (20 meter)
Order Code: 13-APGS-20

Suited to use on wide variety of gutter configurations. The AvePro Deluxe Gutter Spike can be fixed with AvePro Bond (below), tech screws or pot rivets. The ideal spike to provide edge protection for larger birds on gutters.

Deluxe Possum Spike

Width: 45mm
Height: 35mm
Length: 450mm
CTN: (12 x 450mm pieces) 5.4m of spike
Order Code: Brown - 13-APPS-Brown
Black - 13-APPS-Black
Grey - 13-APPS-Grey

Designed to provide an effective deterrent to possums, cats, and rodents that use fences and other architectural features as a passage way. The polycarbonate, pointed spikes attached to fence capping, building ledges, balconies, and rafters are ideal to prevent pests from travelling across them.

AvePro Bond

AvePro Bond is used to securely bond AvePro products and components to most building surfaces and architectural features. It is UV stable, dries flexible, has a neutral cure and adheres strongly to most building surfaces.

This bond is the ideal for installing AvePro Bird Spikes, Shock Track, Bird Angle, Bird Slide, BirdWire Bases and AvePro Huntsman to almost all surfaces.

AvePro Bond is made in New Zealand and is designed for the rigors of the harsh Australian climate and building surfaces.   One AvePro Bond cartridge will fix:

10-12m of Bird Spike
10-15m of Bird Shock
10-12m of Bird Slide
125 BirdWire PVC Bases

Colour: Grey or Clear
Pack Size: 300g
Product Code: 13-APST-30 - Grey
13-APST-45 - Clear

ELECTRIFIED DETERRENTS

AvePro Shock Track

AvePro Shock Track is an electrified system used for edge protection for deterring all pest birds. To power this track, you will need either a Solar or Mains powered Energiser. The 15m flexible track is fixed in place with AvePro Bond. AvePro Shock Track is a high deterrence, low visibility system that has been in use for many years at commercial buildings and industrial structures in Australia and New Zealand.

AvePro Shock Track

Supplied with a 5-year manufacturer's product replacement track warranty.

AvePro Shock Track is particularly useful for difficult-to-manage species such as crows, ravens, cockatoos, Indian mynas and starlings. The system is also well suited to pigeons, sparrows, seagulls and other traditional pest birds.

Recommended for retail, domestic, commercial and historical properties. The track can be easily attached to ledges, pipes, brick and stone walls, steel beams, roofs and parapets using a special bonding agent, and connected to an Australian-made energiser – solar or 240v powered system using energisers.

Ultra discreet – it includes a low profile design, only 8mm high and invisible when viewed from below with a choice of four colours to suit most buildings.

AvePro Shock Track

Height: 7mm

AvePro Tree Shock

Do you have a pest bird issue in trees?

There is nothing worse than a tree full of squawking, mess-making birds. Very often, the problem is so pervasive that property owners actually chop the tree down. Now, there is an attractive, effective, long-lasting solution that conditions the birds to leave the protected tree for good. The Tree Shock™ system is the solution property owners have been asking for.

Thin Branch: Cable Ties every 1-2 feet.

Thick Branch: Cable Tie with Aluminum Nail every 2-3 feet.

Battery powered charger. Battery life 60 days.

"T" connection using Female Snap Taps and Male Connectors.

Lead Wire, Female Snap Taps and Male Connectors crimped to the wires on the tube.

SOLAR EXCLUSION

Solar Panel Pigeon Exclusion

Pigeons that were once confined to nesting in the streetscape of our retail and commercial structures are now occupying the roofs of suburban homes in alarming numbers. With abundant food available at local parks, schools and retail areas, domestic and commercial solar panels are providing the perfect shelter for disease carrying, feral pigeons.

A single home with solar panels can support 40 or more pigeons. The smell, mess, loss of solar panel efficiency and damage to the homeowner's roof, gutters and water harvesting storage is severe.

Solar Panel Bird Proofing using our AvePro Solar Mesh with the unique Solar Mesh Clips provides an easy and effective solution which denies pest birds access without damaging your solar panel(s) or roof. Available in stainless steal with a 10-year manufacturer's warranty, the problem in solved in a few hours averting expensive damage to your roof.

The AvePro Solar Mesh exclusion system is the number one choice in all Australian building environmental situations. Unlike other similar products on the market, AvePro Solar Mesh is not a plastic coated galvanised mesh so there are no issues with rusting on the "cut" edges.

www.PestIT.com

Harm-Free Bird Control

Humane

Symterra EM Pro is silent, odorless, and completely harmless to birds, humans, and other animals.

Proven Effective

Once implemented, our technology is proven to permanently deter any bird that encounters it.

Safe and Simple

We're committed to creating safe and easy to implement systems - because you don't need to replace one hassle with another.

SYMTERRA [FORMERLY FLOCK OFF]

symterra

BEFORE

AFTER

EMF - Electromagnetic Field Technology

Conceived by a quantum physicist in 2009, and developed by experts in Ornithology and Entomology, Flock Off is now known as Symterra. The system uses applied science to disrupt the migratory physiology of birds with a tuned, electromagnetic pulse, only felt by birds.

When birds fly near, Symterra disrupts a key protein in their bodies used to navigate. It affects mineral crystals present in their beaks and wave receptors in their ears, eyes, and brain. This momentarily halts their ability to judge speed, direction and distance. The birds experience what humans might feel as "vertigo" within 1.5m of the system...AND simply cannot land.

Unlike some bird control measures, Symterra is harmless to birds, harmless to humans and harmless to other animals. It is aesthetically pleasing, silent, low-profile and engineered for durability in all environments.

One Symterra system will protect up to 150 linear meters of structure with the capacitor set at 1.2m intervals. With Symterra , Birds humanely and naturally relocate themselves!

New Development for 2024:

At the time of catalogue release, a new version of the system, Symterra 4.0 is set to be available. Consisting of a redesign from the initial system launched by PestIT in Australia and New Zealand in 2022; the new Symterra has the capacitors and insulated wire fused in a series of 30m lengths consisting of 25 capacitors.

Each capacitor is set at 1.2m intervals, with a built in magnet for easy attachment to metal surfaces. The capacitors can also be glued or screwed to other surfaces.

VISUAL DETERRENTS

Eagle Eye Bird Control

Eagle Eye is a bird deterrent system introduced into Australia by PestIT, the innovators in bird management. The Eagle Eye's reflective pyramid rotates via an electric motor or wind-driven bearing, sending the beams around in a menacing pattern. The light spectrum reflected back by the Eagle Eye disorients birds in flight by limiting their vision significantly. This causes the bird to deviate in flight and fly to another destination. Eagle Eye's success in controlling bird problems has led to installation into hundreds of facilities Australia-wide.

Powering your Eagle Eye Unit:

The rotating system works in two ways:

Powered by 12-volt electricity from a 10watt solar panel or from a transformer plugged into an 240v AC outlet. The solar panel provides direct power to the unit that can only run during the day when the reflective flashes are at their most powerful.

Alternatively, wind-driven units can effortlessly rotate the unit. The minor drawback is on completely still days the unit will stand still. However, when used in conjunction with the powered units, the wind-units can expand the Eagle Eye zone at a lower cost.

Coverage:

The Eagle Eye can cover a vast area and should always be installed as part of a system or network of two units or more. The Eagle Eye reflects sunlight back in the direction of the sun, leaving an unprotected area behind the unit. This changes during the day as the sun moves from East to West. Buildings, trees and other obstacles can create shadows as well. To overcome this, multiple units or LED Lights should be used.

AVEPRO
Bird Control Systems

NEW

AvePro Laser Bird Repeller

Introducing the latest in bird deterrent technology – the AvePro Indoor Bird Laser 500.

These mounted bird lasers are ideal scare devices for deterring birds from domestic, commercial, industrial and agricultural situations – day and night!

The laser is suitable for a wide variety of pest birds and works by frightening the birds with intense spots and beams. Even better is local and international use indicates that pest birds do not become accustomed to the constantly moving beam and laser patterns making it a great long term solution.

To install, simply mount the laser on the bracket supplied and adjust the sweeping laser patterns over the area of bird activity. This could be the beam structure of a roof, an indoor area of a loading dock or any covered area impacted by pest birds.

-    Easy to deploy in industrial and commercial situations,
- Low running costs,
- Permanent and automated solution,
-   No habituation: birds do not get used to the laser beam,
- Deters a wide variety of pest bird species.
- 500mW Class 3B Laser

AvePro — Bird Control Systems

AvePro Gotta Go

AvePro Gotta Go is a heavy-duty bird waste cleaner that has the power to lift bird droppings from hard surfaces, including tiles, pavers, concrete and asphalt.

The build-up of bird droppings is associated with a favourite roosting site for local, disease carrying pest birds. While cleaning up the bird droppings is important, deterring the birds from roosting in that spot should also be considered a priority.

While birds are a natural and essential part of our environment, their poop can be unsightly, destructive, a health hazard and compliance risk. The acid in the droppings can be very destructive, can etch into delicate surfaces and accelerate corrosion.

Bird droppings can harbour a wide variety of pathogens that can be harmful to humans, pets and livestock. The build-up of bird poop can also attract other pests. Not only is AvePro Gotta Go an effective bird waste remover, but it is also a potent disinfectant that will sanitise the treated area making it safe for children and pets.

There are few things that are as unsightly as bird poop! It has the ability to make a beautiful and remarkable building look unhygienic and unkempt. Using a product such as AvePro Gotta Go as part of an ongoing building maintenance program will help maintain a building's fine finished and overall appearance and value.

Did You Know: Birds don't just use eye sight and the earths magnetic field for navigation. Equally, birds use the olfactory sense of smell as a vital navigation mechanism. The odour of the roost is an important bond that birds with a specific location such as a night roost. Therefore it is vital to clean your infested bird site with Gotta Go to assist your deterrent to achieve a desired result.

AvePro Gotta RTU - 750ml

Ready-to-use Gotta Go for use on hard surfaces, with no need for dilution.
Product Code: 13-APGG-750

AvePro Gotta Conc. - 5L

Gotta Go Concentrate is ideal for commercial cleaners preparing a bird control site prior to entry or on completion of a project. Mix at a 10:1 ratio, apply, allow to soak (but not dry) and pressure wash away.

PEST BIRD TRAPS

For over a decade, PestIT has been the manufacturer of the world-famous Myna Magnet Trap. This trap has its development origins using extensive research at the Australian National University. The use of the two-chamber trap revolutionised the trapping of such suspicious and 'trap-shy' species such as the Indian or common myna and the European starling.

The Mini Myna Magnet

The Mini Myna Magnet trap is an effective trap for Indian mynas. It includes all the welfare options you would expect from the original Myna Magnet such as feed and water dispensers, solid roof, no sharp edges and a highly engineered 25-piece one-way valve. The collapsible design allows easy storage and transport after trapping is complete. Unlike home-made mesh traps which can result in scratches, bird and human injury, rusty components and bird escapees, the trap is durable, well designed and manufactured to a high quality.. Product Code: 07-Trap10

The Pigeon Magnet

This trap has successfully and humanely assisted facilities in Australia, New Zealand and Asia with the removal of this disease-carrying species. Trapping pigeons is easy, safe, discrete and targeted with the Pigeon Magnet. Size: 600mm x 700mm x 700mm
Product Code: 07-Trap11

The Sparrow Magnet

The Sparrow Magnet Trap is a simple, yet effective multi-capture trap designed to trap elusive sparrows in commercial situations. Attract sparrows with pre-feeding using millet seed and water. The Sparrow Magnet Trap can catch and hold 20 or more pest sparrows at one time. This humane pest bird trap is constructed with galvanised mesh and heavy-duty removal door. Dimensions: 43cm (long) x 30cm (wide) x 15cm (high). Full instruction of use are provided with your purchase.
Product Code: 07-Trap13

Cleaner Greener Smarter

The Magnet Trap Range

The Magnet Trap vision is to preserve Australia's rich biodiversity for native species, maintain the highest level of animal welfare and assist our clients with the best available professional trapping systems. All Magnet Traps are designed in Australia with heavy duty collapsible cage construction, mesh base for easy cleaning and optional storage bag. Our optional humane CO_2 gassing kit is now available for humane dispatching of pest birds.

Fox Magnet

The Fox Magnet is a commercial-grade, large, collapsible, live-capture trap for foxes. Cage trapping offers government agencies, NGOs and landholders an excellent Integrated Pest Management (IPM) alternative to shooting, leg-hold trapping and poisoning, which is especially useful in peri-urban areas, commercial facilities and townships.
Size: 1050mm x 450mm x 370mm

Trap set includes: Main trap, hinges, split pins and instructions (by download).
Product Code: 07-Trap14

Cat Magnet

The Cat Magnet is a heavy-duty, medium sized, collapsible, live-capture trap used for feral cats and possums. Feral cats are growing in numbers throughout Australia's cities, suburban and rural areas. They are attributed with killing many thousands of native bird and animal species – every day! Size: 600mm x 300mm x 300mm

Trap set includes: Main trap, hinges, split pins and instructions (by download).
Product Code: 07-Trap15

Cleaner Greener Smarter

VERTEBRATE PEST TRAP ACCESSRIES

The collapsible nature of these traps is a tremendous feature for professionals, whereby the trap quickly collapses to approximately 15 percent of its initial size. This alone is ideal for both vehicle transport and after use storage.

Trapping programs can be conducted at regular intervals – monthly, quarterly, annually as needed.

Trapping is targeted, therefore protected species caught can be released. Trapping is discreet and humane with animals provided food and water.

Possum Magnet

The Possum Magnet is a heavy-duty, medium sized, collapsible, live-capture trap used for possums and feral cats. Possums in Australia are native species and are afforded protection and therefore, local legislation must be considered.

The quality of a cage trap is often measured in weight. A typical imported collapsible possum/cat trap weighs 2kg. The Australian-designed Possum/Cat Magnet weighs 6kg.

Trap set includes: Main trap, hinges, split pins and instructions. Product Code: 07-Trap12

Size: 600mm x 300mm x 300mm

Magnet CO2 Dispatch Kit

Magnet CO2 Dispatching Kit for humane euthanasing of exotic pest birds. The kit is to be used in conjunction with a bucket. This kit is not compatible with the Gassing Bag.

BRC Fly Control Systems

BRC Fly and Insect Control – Clean, Efficient and Effective! BRC insect and fly traps are suited to all environments, including the harshest kitchen, commercial and industrial situations. Whether electric or glueboard based, the insect traps offer the most reliable solution against flying insects, at a low operating cost. In fact, their effectiveness is based on the strong attraction of insects to the UVA fluorescent lamps. Their non-polluting properties and chemical- and odour-free features make them environmentally friendly, sustainable, economical and durable. Several criteria should be taken into consideration in determining what best fits your requirements.

Fly Units:

European designed and made BRC fly traps are suited to all environments, including the harshest kitchen, commercial and industrial situations. Whether electric or glueboard based, the insect traps offer the most reliable solution against flying insects, at a low operating cost. In fact, their effectiveness is based on the strong attraction of insects to the UVA fluorescent lamps.

Their non-polluting properties and chemical- and odour-free features make them environmentally friendly, sustainable, economical and durable.

Accessories:

PestIT carries a significant array of accessories which includes lamps, tubes, glueboards, starters, chains, etc for the BRC range as well as other brands including PestWest and many others.

See our website for an up-to-date list of consumables, product codes and specifications.

INSECT PEST TRAPS

INSECT PEST TRAPS

World-wide, insects cause billions of dollars in contamination and damage to food for human consumption. Insects impacting commercial food production include stored product pests, cockroaches, flies and the like.

In addition, some insect species spread disease (flies, cockroaches and mosquitoes), cause havoc (bed bugs), damage natural fibres and clothing (textile moth and carpet beetles), destroy wooden buildings (termites), inflict bites and stings (ants and wasps), and so on.

Insect's impact 10% of the Gross Domestic Product (GDP) of Industrialised Nations and at times, up to 25% of the GDP of developing nations. From a business perspective, Australia food producers need to protect food retail, production and storage to ensure an efficient outcome, reduced spoilage and contamination. Equally, companies must avoid insects' impact to product integrity, company reputational damage, customer complaints and ultimately costly product recalls.

While there is a firm hold of pesticide use for insect control; PestIT's commitment is to develop modern, non-toxic and technology advancements to insect pest management as it has for rodent and bird management.

Viper Cockroach Trap

Viper Pantry Trap

Viper Silverfish Trap

Viper Cockroach Glue Trap

The Viper Deluxe Cockroach is a premium, baited monitoring glueboard. Inexpensive in cost, yet valuable to every cockroach control process. The large surface area of this "low profile" cockroach trap will be ideal to add to all commercial and domestic cockroach management programs. Viper Cockroach Glue Trap is a professional, baited cockroach trap.

Colorado Tri-Flo Systems LLC

Tri-Flo Electric Bed Bug Heater

Tri-Flo Electric Bed Bug Heaters are the next evolution in bed bug treatments! This is a convenient, practical yet powerful 240v range. Not only do traditional chemical treatments leave behind a hazardous residue which can be harmful to people, research shows that continuous chemical exposure has led to many pests such as bed bugs building a resistance. While infestations are on the rise, this has resulted in a need to create better, safer solutions for bed bug control and eradication.

Eradi-Flo heaters are safe, effective, environmentally friendly, Australian compliant and carry the CE Mark to mitigate liability issues. Eradi-Flo heaters run on Australian 240-volt electrical services.

Tri-Flo Eradi-Flo 5000

- 5,000-watt heater
- Compatible with all 240-volt international plugs
- Requires two 240V 13-amp circuits
- Each circuit draws 10.4 amps at 240-volts
- 17,100 BTU's
- Fan speed 800 CFM
- Maximum temperature 68°C
- Dimensions: 559 mm x 565 mm x 400 mm
- Weighs: 15kg
1400 and 1800 versions are available on request.

Pack of EA

VACUUM TREATMENT

The Bug Vac

Why just kill bugs with messy toxic pesticides, when you can quickly and safely eliminate them with The Bug Vac?

The Bug Vac 3.8L HEPA dry particulate vacuum that is ideal for the IPM Professional. With its self-contained HEPA filter, hose plugs and filter plugs, nothing is crawling out or falling out during transport and storage.

"The" Bed Bug Vacuum. HEPA Efficiency: 99.97% @ .3 micron. "True" HEPA filter and powerful motor safely and effectively eliminate both live and dead pests along with their eggs and faeces. The vacuum fits perfectly in the cab of a truck, and can be used on nearly every job a Professional Pest Manager goes on.

Filtration features an immediate containment HEPA Filter Cartridge that virtually eliminates the risk of exhausting dangerous bacteria - the potentially fatal hantavirus - out into the air. Most odours are contained. Hose and filter plugs also come standard. This unit is powerful and quiet and captures everything from bed bugs to cockroaches and even hazardous particles, with built-in sound suppressing technology.

The immediate containment "True" HEPA filter and powerful motor safely and effectively eliminate both live and dead pests along with their eggs, larvae and faeces. The vacuum is compact and fits perfectly into service vehicles, and can be used on nearly every job a professional pest manager goes on.

POWERFUL and QUIET - this will capture everything from bed bugs to cockroaches and even hazardous particles, with built-in sound suppressing technology. Made in the USA with a 3 Year Limited Warranty.

Ideal for Pest Control and Management applications. Clean-up of bed bugs, cockroaches and rodent droppings.

Product Code: 16-VACOMEGA
